Lyman Turbosonic Power Pro & Accessory Lube Tank

Turbosonic Power Pro # 7631734

This system's extra-long, heated tank and ten powerful industrial transducers allow users to quickly and easily clean, lubricate and protect the widest range of metal items.

Designed for high volume cleaning or for larger than normal items, the Turbo Sonic Power Pro's 34³/₄" heated stainless steel tank can easily handle larger items.

The powerful industrial transducers aggressively deep clean and degrease items, both inside and out. In fact, the Power Pro is such an effective cleaner that Raytech recommends that cleaned parts immediately be ultrasonically treated with Lyman's Turbo Sonic Lube. Changing from cleaning to lubrication is easy with the built-in drain system.

Designed for volume professional usage, the Power Pro features an all-stainless design and professional controls. The Power Pro has both a timer and an adjustable heat control. Temperatures up to 175 degrees can be selected.

Power Pro Accessory Lube Tank # 7631739

This rugged, stainless tank is designed to sit in the PowerPro's cleaning tank which remains filled with cleaner. The unit's powerful ultrasonic action is transmitted through the cleaning solution into the accessory tank filled with lube. No tank draining or cleaning needed.

- A perfect and necessary accessory for the Power Pro Ultrasonic Cleaner
- Allows deep ultrasonic cleaning and sonic lubrication in the same unit
- Side brackets support the accessory tank, allowing it to sit in the cleaning solution, transferring the ultrasonic action to the lube
- Tough, welded metal construction
- Large handles make moving the tank easy
- Huge time savings when cleaning and lubing multiple items
