

Ideal for the Automotive Pro

Lyman offers the market's largest and most powerful ultrasonic cleaning system: The Turbo Sonic Power Pro. This industrial grade machine features ten powerful transducers, a heated stainless steel tank, and sturdy steel construction. The Power Pro aggressively deep cleans and degreases items, both inside and out. In fact, it is such an effective cleaner that Lyman recommends that cleaned parts immediately be ultrasonically treated with Lyman's Turbo Sonic Lube.

Designed for high volume cleaning, the 34.75" heated stainless steel tank can easily handle large items such as rifle barrels and car parts.

The system can be used both for cleaning and lubing. Changing from cleaning to lubrication is easy with the built in drain system, or some shops set up two units to have both options available as needed. Lyman now offers both cleaning concentrate and parts lubricant in gallon containers.

The Power Pro is on wheels to make it easy to move around the shop. For complete control of the process, the Power Pro has both a timer and an adjustable heat control up to 175 degrees.

TurboSonic® Lube

Specifically formulated for ultrasonic use right out of the bottle, TurboSonic Lube displaces moisture and penetrates all the hard to reach areas of any part making it ideal for use after ultrasonic cleaning. Formulated for superior lubrication and protection, the lube leaves a dry, protective, lubricating film and can be reused repeatedly.

TurboSonic Lube 1 Gallon (#7631735)

TurboSonic® Steel Cleaner

Our steel cleaning solution is the perfect choice for steel or stainless steel parts, and used in the Power Pro, it will deliver superior cleaning, both inside and out. Designed for high volume cleaning, the gallon containers of TurboSonic solutions provide plenty of cleaning concentrate.

Steel Cleaning Solution 1 Gallon (7631736)
